

Representative Rates — Mining, Uranium & Land Management

Figures below are typical ranges, not fixed prices — every engagement is scoped to the specific project and confirmed in writing before work begins. Claim-stage work is priced per project based on claim count, district, and land status; forestry, mitigation, and GIS work is typically fee-for-service or project-based.

MINING & URANIUM CLAIM WORK

Hard-rock, ISR & BLM-administered claims — priced per project.

Mining claim title research & GIS claim mapping
Contact for current pricing

BLM MLRS claims research, staking & filing
Contact for current pricing

ISR (in-situ recovery) wellfield land & lease title work
Contact for current pricing

FORESTRY, MITIGATION & GIS

Fee-for-service or project-based; often grant/budget-funded.

Forestry & vegetation management consulting
Contact for current pricing

Mitigation banking & habitat due diligence
\$85 – \$150 / hr
or project-based

GIS-based ownership & boundary mapping
\$65 – \$100 / hr
or per-exhibit flat fee

HOW RATES ARE SET

Claim-stage pricing depends on claim count, district and BLM field office, and land status research complexity — ask for a project-specific quote. Forestry, mitigation, and GIS work is priced by scope, acreage, and funding source; projects tied to a grant or philanthropic disbursement schedule can be scoped around that cycle.
